1 – When using this round at or near the minimum safe distance, the operator must evaluate the totality of circumstances (i.e. judgment, discretion, common sense) in relation to officer factors/judgment (i.e. subject factors, environmental factors, unknown factors, etc.) to determine whether or not deploying the round is appropriate for the situation.

**PRODUCT DESCRIPTION**	
The ALS4006DXOC REACT round is an extended range direct fire round designed to combine blunt trauma pain compliance with OC irritant upon impact. It is highly accurate and effective across a broad range of distances.  The round is most effective when used within the optimal range of 10-70 yards. Operators should be well trained in the use of Less Lethal munitions regarding shot placement including, but not limited to, factors such as: level of threat, target distance, and clothing. The optimal range allows for accurate targeting of the large muscle groups of the subject providing sufficient pain stimulus while greatly reducing the risk of serious or life-threatening injuries.
