CHEMICAL MUNITIONS

PRODUCT DESCRIPTION

The ALSG274CS is a pyrotechnic rubber ball that is designed to deliver a high volume of chemical agent upon initiation, and is very effective for the dispersal and control of crowds. The CS Handball utilizes a Model M201A1 fuze and discharges chemical agent for approximately 10-20 seconds. The Rubber ball form factor is ideal for corrections/riot applications, as it reduces the potential for “throw back”.
